Projects

Fog-Aware Object Detection System using OpenCV —deep learning, YOLOv8	Nov 2025
- Developed a fog-aware object detection system using OpenCV and deep learning, enabling image preprocessing, fog density analysis, and visibility enhancement in low-visibility conditions. - Implemented YOLOv8, Faster R-CNN, and DETR with OpenCV-based bounding box visualization and confidence filtering to improve detection accuracy.	
Automated Grading System — XGBoost, Random Forest, Python	Dec 2024
- Developed a machine learning pipeline to predict student scores with over 95% R² accuracy, leveraging advanced regression models and rigorous evaluation metrics - Improved performance through data preprocessing, feature engineering, and model tuning.	
Trackify – Smart Price Tracker — React.js, Node.js, SendGrid,	May 2025
- Built a price tracking system using Puppeteer, Cheerio, and SendGrid for real-time e-commerce monitoring with automated email alerts. - Integrated Gemini AI to summarize product listings and support faster, data-driven decision-making.	

Technical Skills

- Programming Languages:** python, Java, C, SQL, DSA
- Tools:** JupyterNotebook, VSCode
- Web Technologies:** HTML, CSS, JavaScript
- Databases:** MySQL
- Soft Skills:** Collaboration, Adaptability, Time Management

Certifications

Deloitte Data Analytics Job Simulation (Forage)	July 2025
Practical experience in data analysis and forensic technology.	
Full Stack Developer Bootcamp	
Completed a 6-week Full Stack Developer Bootcamp by GeeksforGeeks	July 2025

Publications

IoT-Integrated Hand Glove for Cerebral Palsy Therapy	Springer PEIS 2025
Presented the paper “Interactive Gaming Therapy for Children with Cerebral Palsy” at PEIS 2025, NIT Uttarakhand.	
IoT-Integrated Air Quality Monitoring System	Springer CRM 2025
Presented the paper “IoT-Integrated Air Quality Monitoring System” at the 3rd Congress on Control, Robotics, and Mechatronics (CRM 2025), SR University, Warangal, India.
