Professional Summary

Computer Science undergraduate specializing in Artificial Intelligence with strong hands-on experience in machine learning, deep learning, computer vision, and data-driven problem solving. Experienced in developing real-time intelligent systems, working with modern AI frameworks, and applying analytical techniques to build scalable, practical solutions.

Education

Amrita Vishwa Vidyapeetham, Bengaluru, KA <i>B.Tech in Computer Science (Artificial Intelligence Engineering)</i>	2022 – Present <i>CGPA: 7.45</i>
Kamala Junior College, Markapur, AP <i>MPC, Class XII</i>	2020 – 2022 <i>Percentage: 90.7%</i>
Kamala Concept School, Markapur, AP <i>SSC, Class X</i>	2019 – 2020 <i>Percentage: 100%</i>

Projects

Dual-Model Real-Time Detection of Persons and Handguns Using Enhanced YOLOv8 with SE Attention Mechanisms	2025
- Engineered a high-precision surveillance system using YOLOv8 for simultaneous detection of people and handguns. - Optimized detection using Squeeze-and-Excitation (SE) mechanisms, achieving 92% accuracy for people and 88% for handguns at real-time FPS. Tech Stack: Python, YOLOv8, OpenCV, Deep Learning, Computer Vision	
IoT-Driven Hanging Detection and Response	2024
- Developed an emergency system using force sensors and Arduino UNO to identify abnormal loads on fixtures. - Deployed an automated response unit with GSM-based SMS alerts, audible alarms, and electric door locks. Tech Stack: Arduino UNO, Force Sensor, GSM Module, Embedded Systems, IoT	
AI-Driven Personalized News Broadcasting with Real-Time NLP and Multimedia Integration	2025
- Architected a news system using transformer-based NLP models for real-time text classification and sentiment analysis. - Integrated multilingual text-to-speech (TTS) features and an interactive interface for personalized news delivery. Tech Stack: Python, Transformers, NLP, Machine Learning, TTS	

Technical Skills

Programming Languages: Python, Java
AI & Machine Learning: Machine Learning, Deep Learning, Computer Vision, Natural Language Processing
Frameworks & Libraries: YOLOv8, OpenCV, NumPy, Pandas, Transformer Models
Model Development: Model Training, Evaluation, Optimization, Real-Time Inference
Databases & Backend: MongoDB, SQL, REST APIs
Tools & Platforms: Git, GitHub, Postman

Certifications

Computer Vision Onramp – MATLAB MathWorks	2025
Image Processing Onramp – MATLAB MathWorks	2025
Data Analytics Job Simulation – Deloitte / Forage	2025

Academic Research & Recognition

IoT-Driven Hanging Detection and Response	<i>IEEE ICISS 2025</i>
Cloud-Based Image Processing and Augmentation	<i>Springer SPIN 2025</i>
Dual-Model Real-Time Detection of Persons and Handguns Using Enhanced YOLOv8 with SE Attention Mechanisms	<i>IEEE WCCEST 2025</i>
AI-Driven Personalized News Broadcasting with Real-Time NLP and Multimedia Integration	<i>IEEE CSITSS 2025</i>
