Professional Summary

Computer Science undergraduate with strong programming skills in Java and Python and hands-on experience in software development, backend systems, and cloud-based applications. Demonstrated ability to design reliable, scalable solutions and adapt quickly to new technologies in fast-paced development environments.

Education

Amrita Vishwa Vidyapeetham, Bengaluru, KA <i>B.Tech in Computer Science (Artificial Intelligence Engineering)</i>	2022 – Present CGPA: 7.45
Kamala Junior College, Markapur, AP <i>MPC, Class XII</i>	2020 – 2022 Percentage: 90.7%
Kamala Concept School, Markapur, AP <i>SSC, Class X</i>	2019 – 2020 Percentage: 100%

Projects

Dual-Model Real-Time Detection of Persons and Handguns Using Enhanced YOLOv8 with SE Attention Mechanisms	2025
- Engineered a real-time surveillance system using YOLOv8 for simultaneous detection of persons and handguns. - Enhanced feature representation using Squeeze-and-Excitation (SE) attention, achieving 92% accuracy for person detection and 88% for handgun detection at real-time FPS. Tech Stack: Python, YOLOv8, OpenCV, Deep Learning, Computer Vision	
Cloud-Based Image Processing and Image Augmentation	2024
- Designed a scalable cloud-based system for automated image storage, face recognition, and image augmentation using serverless architecture. - Implemented AWS Rekognition for face detection and categorization, and performed real-time image augmentation using OpenCV and Pillow libraries. - Enabled automated processing through AWS Lambda triggers with secure and scalable image handling. Tech Stack: Python, AWS (S3, Lambda, Rekognition), OpenCV, Image Processing, Cloud Computing	
Hybrid Cryptography-Based Image, Audio, and Video Steganography	2025
- Developed a secure multimedia data-hiding system by combining cryptography and steganography techniques. - Encrypted secret data using AES and secured encryption keys with RSA before embedding into image, audio, and video files using LSB-based steganography. - Achieved high imperceptibility and 100% data recovery accuracy while preserving media quality. Tech Stack: Python, AES, RSA, Steganography, Multimedia Processing, Information Security	

Technical Skills

Programming Languages: Java, Python
Core Concepts: Object-Oriented Programming (OOP), Data Structures, Algorithms
Backend Development: Node.js, Express.js, RESTful APIs
Databases: MongoDB, SQL
Frontend Basics: HTML, CSS, JavaScript
Tools & Version Control: Git, GitHub, Postman
System Fundamentals: Computer Networks, OSI Model, TCP/IP

Certifications

Computer Vision Onramp – MATLAB MathWorks	2025
Image Processing Onramp – MATLAB MathWorks	2025
Data Analytics Job Simulation – Deloitte / Forage	2025

Academic Research & Recognition

IoT-Driven Hanging Detection and Response	<i>IEEE ICISS 2025</i>
Cloud-Based Image Processing and Augmentation	<i>Springer SPIN 2025</i>
Dual-Model Real-Time Detection of Persons and Handguns Using Enhanced YOLOv8 with SE Attention Mechanisms	<i>IEEE WCCEST 2025</i>
AI-Driven Personalized News Broadcasting with Real-Time NLP and Multimedia Integration	<i>IEEE CSITSS 2025</i>
