

# CHEBROLU SAI KUMAR

Kavali, Andhra Pradesh

📞8074614721 ✉️saikumar.chebrolu7@gmail.com [linkedin.com/in/Chebrolu Sai Kumar/](https://www.linkedin.com/in/Chebrolu Sai Kumar/) [github.com/SAIKUMAR0044/](https://github.com/SAIKUMAR0044/)

## Career Objective

A passionate and dedicated Computer Science Engineering student with a specialization in Artificial Intelligence. Seeking opportunities in Cybersecurity, Web Development, and Data Management to leverage my technical and analytical skills. Enthusiastic about contributing to innovative projects while continuously expanding my knowledge and experience.

## Education

### Amrita Vishwa Vidyapeetham

B.Tech in Computer Science (AI Specialization) — 7.11

2022 – 2026

Bengaluru, Karnataka

### Narayana Junior College

12th Standard — Percentage: 92.7

2020 – 2022

Nellore, Andhra Pradesh

### Gitanjali School

10th Standard — Percentage: 97

2019 – 2020

Nellore, Andhra Pradesh

## Projects

### IoT-Driven Hanging Detection and Response | Embedded Systems, IoT

2024

- Designed and implemented a safety system that prevents suicides by hanging from ceiling fans.
- Developed a spring-loaded fan mechanism that automatically lowers the person to the ground during an attempt, triggering an emergency alert.
- The system sends a phone call and message notification, activates an alarm, and automatically opens the door to ensure the person's safety.

### Real-Time Human and Handgun Detection Using YOLO V8 | Python, YOLOv8, OpenCV

2024

- Implemented real-time human and handgun detection using YOLOv8, enhancing security surveillance with high accuracy.
- Optimized object detection model for real-time performance, achieving improved precision and speed in firearm identification.
- Integrated the system with live video feeds, enabling instant threat detection for security applications.

### Parkinson's Disease Detection from Facial Analysis | Python, Machine Learning, MediaPipe

2024

- Developed a system to detect Parkinson's disease through facial analysis using machine learning and deep learning models.
- Created a custom dataset and implemented various models to evaluate their accuracy and performance.
- Utilized MediaPipe to preprocess and prepare the data for model training.

## Publications

- IoT-Driven Hanging Detection and Response - IEEE ICISS 2025 Cloud Based Image Processing and Image Augmentation - Springer SPIN 2025

## Certificates

### AWS Academy Graduate - AWS Academy Introduction to Cloud

2024

AWS Academy

### Image Processing Onramp - MATLAB

2025

## Technical Skills

**Languages:** C Programming, Java, Python, DSA, OOPs

**Technologies/Frameworks:** Operating System

**Skills:** Problem Solving, Communication Skills
